ARRT® Coding for X-Ray Lady® All Courses

Below are the ARRT® credit distributions for all X-Ray Lady® CE courses. All X-Ray Lady Courses may be used for CQR or structured education requirements. It is your responsibility to determine if a course will apply towards your specific needs.

Important Information about CQR

Need help determining what would be best for you? Simply **send your CQR prescription over and we can help!** Call or email us and let us do the legwork for you!

According to the ARRT®:

*“You'll complete CQR once every 10 years for each ARRT® credential you've earned since 2011. * If you're a Registered Radiologist Assistant™, you'll fulfill CQR for that discipline too, regardless of when you earned it. You'll have three years to finish the process, and we'll notify you when your compliance window opens. At that point, you'll work through CQR in three easy steps:*

PROFESSIONAL PROFILE

You'll identify the types of procedures you perform and how often you perform them. You'll then see how your experience compares to that of others in your discipline.

STRUCTURED SELF-ASSESSMENT

The Structured Self-Assessment (SSA) isn't a test—and you can't fail. It will simply help you identify any gaps in knowledge related to your credential. You'll have options for taking your SSA at a Pearson VUE professional center or online at home with a remote proctor monitoring you through a webcam.

PRESCRIBED CE

If your SSA reveals any areas for learning opportunities, we'll prescribe specific Continuing Education (CE) activities for you to complete. In most cases, those prescribed CE activities will also count towards your biennium CE requirements.”

For more information, please visit the ARRT® website by clicking [here](#) or contacting them via phone at (651) 687-0048, ext. 8540

Important Information about ARRT® Structured Education

Please note that structured education requires 16 hours with at least one hour in each of the main categories of the content specifications for that discipline. It is your responsibility to determine if a course will apply towards your specific needs. It is the responsibility of the technologist to ensure that all requirements are met in order to establish eligibility to sit for any post-primary examination administered by the ARRT®.

According to the ARRT®:

“Candidates for the post-primary certification and registration must meet clinical experience requirements before signing the application for certification and registration. The requirements call for completing and documenting specific numbers of repetitions for various procedures, which must have been completed during the 24 months immediately preceding the application date. When clinical experience requirements are updated, candidates are allowed a two-year grace period during which either the old or new requirements are acceptable.

Beginning January 1, 2016, candidates for post-primary certification and registration will also be required to complete 16 hours of structured education related to the content outlines for that exam. Acceptable forms of structured education include:

- *Academic courses from an institution accredited by a mechanism recognized by the ARRT® for an academic degree,*
- *CE opportunities approved by a RCEEM or RCEEM+, or*
- *A combination of the two options.*

Candidates will need to document at least one CE credit or its equivalent of structured education in each certification and registration content category; the remaining hours may be distributed among any categories of the content outlines.”

For more information, please visit the ARRT® website by clicking [here](#) or contacting them via phone at (651) 687-0048. For the Continuing Registration department, use extension 8540. For the Clinical Experience Requirements department, use extension 8570.
